

## CHA-BroadWire2300

This is a compact broadband HF band wire dipole antenna with a total length of approximately 10m.

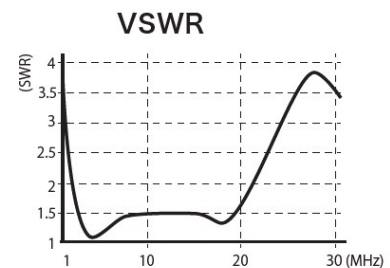

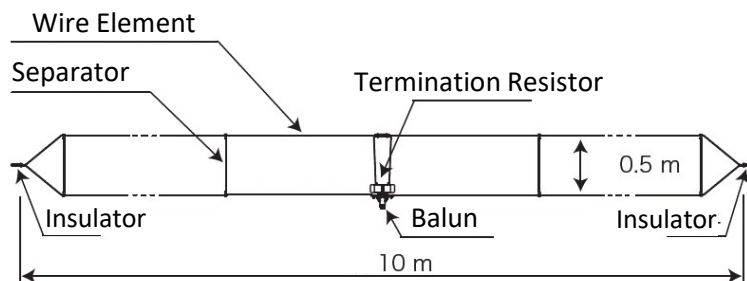

While it is the first in the industry to specialize in 7MHz, it can also be used over a wide range of HF bands (1.8 to 30 MHz).

### Features

Although it is an adjustment-free broadband antenna, it is the first in the industry to be specialized for 7MHz.

Unlike the conventional T2FD type, it not only has flat characteristics, but also focuses on the characteristics of the popular 7MHz band.

1	Impedance	50Ω (unbalanced)
2	VSWR	under 2.0(7 ~ 21MHz) under 4.0(other bands)
3	Frequency	1.8 ~ 30MHz ※Some frequencies require a tuner
4	Max input	150W(SSB)
5	Connecter	M-J
6	Length	10m
7	Weigth	1.7Kg
